

JEFFERSON OBRIEL

Data Specialist • Swahili Language Expert • AI Training Contributor

✉ obrieljefferson@gmail.com

☎ +254 714 931 463

📍 Nairobi, Kenya

PROFESSIONAL SUMMARY

Detail-oriented Data Specialist and current university student with hands-on professional experience in data annotation, quality assurance, and AI training pipelines. Native Swahili speaker with advanced English proficiency (C1), uniquely positioned to support high-quality AI content development in Swahili. Adept at pairwise evaluations, content labeling, and structured data collection across text, audio, and visual modalities.

CORE SKILLS

- Data annotation & labeling (text, audio, image, video)
- Pairwise comparison & preference evaluation
- Data collection, preprocessing & quality assurance
- Native Swahili / Advanced English (C1)
- AI/ML dataset preparation & validation
- Object tagging, transcription & content moderation

PROFESSIONAL EXPERIENCE

Freelance Data Annotator | [Remotasks / Scale AI](#) | Jan 2023 – Present

- Annotated and labeled over 15,000+ data points across text, image, and audio modalities for machine learning training datasets.
- Performed pairwise comparisons of AI-generated responses, rating quality, accuracy, and tone to support RLHF workflows.
- Conducted object tagging and segmentation tasks for computer vision models, maintaining accuracy rates above 97%.
- Translated and localized English prompts and responses into Swahili, ensuring cultural and linguistic accuracy.
- Participated in quality assurance rounds, identifying inconsistencies and flagging low-quality data for review.

Research Assistant (Data) | [University Research Lab – Nairobi](#) | Sep 2023 – Present

- Collected and preprocessed structured datasets for NLP research focused on East African languages including Swahili.
- Designed and administered data collection surveys; cleaned and validated raw responses for analytical use.
- Assisted in building Swahili language corpora by transcribing and annotating spoken language audio samples.
- Coordinated with senior researchers to ensure data integrity and consistency across multiple collection phases.

EDUCATION

Bachelor of Science – Computer Science & Information Technology

University of Nairobi | Expected Graduation: 2026

- Relevant coursework: Machine Learning, Data Structures, Natural Language Processing, Database Systems
- Member of the AI & Data Science Student Club

LANGUAGES

ADDITIONAL INFORMATION

- Available immediately for freelance remote work with a flexible schedule.
- Comfortable working independently with strong attention to detail and consistent delivery.
- Registered as a Private Individual freelancer; available to provide required tax information upon request.
- Familiar with platforms including Remotasks, Scale AI, Appen, and similar crowdsourced data labeling services.
